

Museum, Art & Archive Storage

HYDESTOR[®]
SHELVING

New Zealand's Shelving & Storage Solutions Leader

At Hydestor we specialise in the design, manufacture and install of quality shelving and storage solutions for a wide range of New Zealand organisations. And we're specialists for a reason.

Getting a great shelving or storage outcome is much more than simply finding a good quality shelf or cabinet. We'll help you layout shelving or storage to maximise space and make the usability convenient for everyone. We'll help you avoid potential issues (like shelving systems that are too tall for your space and put you in breach of fire safety regulations) and, we'll help you create the most cost effective solution to meet your needs and space requirements.

Not all shelves are created equal and, more accurately, not all shelves are used equally. Make sure your storage solutions are not only great products, but thoughtfully designed and planned to make them work for your specific needs.

What we offer:

- An assurance of quality, competitive pricing, excellent service and design flexibility as you are dealing directly with the manufacturer
- A full no cost consultancy service
- A choice of a large number of standard sizes or customised products made to order
- Specialised design solutions tailored to meet your requirements
- A written PS3 Producer Statement issued for every installation as assurance of quality installation
- Extensive range of powder coat colour finishes

Museums have a wide variety of storage challenges. From art storage through to microscopic slide storage our range of shelving and storage solutions have been helping museums in New Zealand and Australia solve their storage challenges for over 25 years.
